Alert: Pay.gov Browser Compatibility

The most recent version of the Treasury's Pay.gov system, version 3.2, is scheduled to be deployed on August 28, 2005. This is the system by which CM/ECF users make fee payments over the Internet, via credit card.

Recent testing has confirmed that version 3.2 of Pay.gov does not work properly with Netscape 4.7 in the processing of fee payments. Version 3.2 of Pay.gov and all future versions will be certified to run only with Internet Explorer.

Users who have not already done so are encouraged to acquire and use Internet Explorer 5.5 or higher as soon as possible for all fee payments. (While not certified through testing, current versions of other browsers - Netscape 7.xx or higher, e.g. - may, in fact, work as well.)

Netscape will continue to work with CM/ECF in all respects other than making fee payments using Pay.gov.
